

FMCSA Specifications for Federal Procurements of Field Portable Computers and Peripherals

Updated: 11/2/2005 2:01 PM CLF

This document provides specifications for FMCSA procurements of portable computer and peripheral hardware for field use. These specifications must be followed for all FMCSA procurements that meet the definitions below. The specifications in this document are updated two-to-four times per year and upon request.

If you have any questions regarding these specifications, please contact Jeff Hall or Janet Curtis with the FMCSA Systems Development Team.

MANAGER LAPTOPS (Updated 10/01/2005)

This specification is for a lightweight laptop for use primarily for e-mail, scheduling, address book information, and minimal word processing. Although the specified unit can be used for much more, the trade-off for going with a lightweight unit is a decrease in ease-of-use. If a manager feels he/she will be running CAPRI, ASPEN, CaseRite, or performing a great deal of word processing, we recommend procuring the standard SI laptop.

PERSONAL DIGITAL ASSISTANT (PDA)

FMCSA has established three specifications for handheld computer devices. The first is for use by managers solely as a personal information management tool and is referred to as the “Manager PDA.” The unit is small and lightweight, but lacks expandability. The second unit is for use by field personnel in conducting enforcement activities such as driver/vehicle inspections and is referred to as the “Field Activity PDA.” This unit is somewhat larger, heavier and expensive, but is much more flexible, expandable, and has integrated wireless LAN connectivity. The third is for personnel that need a PDA with a built-in keyboard for more text entry. This is referred to as the “Expanded Manager PDA.”

LAPTOP CARRYING CASE (Updated 10/01/2005)

Model unspecified, but should, at minimum, accommodate laptop, printer, and all accessories. Suggested manufacturers, include Tenba and Targus. Styles to consider include wheeled, over the shoulder portfolio, and backpack. Models to consider include:

Targus – Top-loading Air Universal	(\$ 99)
Targus – Port 3.1 Easyroller Case	(\$149)
Tenba – Tenba Computer Traveler	(\$170)

MEDIA TYPES (Updated 11/01/2005)

Recommended media types (floppy disk is no longer recommended, but continue to be serviceable):

- CD-RW – Re-writable CD format, 700 MB capacity.
- CD-R – Write-once CD format, 650 MB capacity.
- USB Flash Drives – Solid state drive, nonvolatile Compact Flash memory, plugs into USB port, Re-writable, recommended capacity 256 MB or higher. These drives may be used with any Windows 2000/XP computer with a USB 1 or 2 drive. The recommended flash drive is SanDisk 256 MB Cruzer.
- SD card – Secure Digital card, solid state nonvolatile flash memory, high data transfer rate and low battery consumption, recommended capacity 1 GB. An SD card is about the size of a postage stamp and weighs approximately two grams. The SD card is used by the HP IPAQ PDA for removable data storage. The recommended SD Card is SanDisk 1GB Ultra II.
- Compact Flash II card – CF cards are nonvolatile solid state flash memory cards approximately the size of a matchbook. Recommended capacity 1 GB. CF cards are used by the Canon S45 digital camera for removable storage. The recommended CF card is the SanDisk 1GB CompactFlash.
- DVD-RW + -Re-writable DVD format, 4.7 GB capacity.
- Mini CD-R – Ritek RiData Mini CD-R, 210 MB capacity.
